

SAKATA 3D PA-NT (Nylon) filament consists of an unfilled copolyamide, specially designed for 3D FDM/FFF printers. It shows a high transparency, low moisture absorption capacity, high hardness and excellent mechanical and chemical properties. It can be easily printed on open and/or closed printers. Made in Spain by POLIMERSIA GLOBAL S.L.

| FILAMENT SPECIFICATIONS  | Unit | Value       |
|--------------------------|------|-------------|
| Diameter                 | mm   | 1.75 ± 0.03 |
| Max. roundness deviation | mm   | 0.03        |
| Net weight               | g    | 850         |

| PHYSICAL PROPERTIES                    | Standard   | Unit              | Value               |
|--|------------|-------------------|---------------------|
| Density                                | ISO 1183   | g/cm <sup>3</sup> | 1.15                |
| Haze                                   | ASTM D1003 | %                 | 3                   |
| Moisture absorption                    | ISO 62     | %                 | 3                   |
| Water absorption                       | ISO 62     | %                 | 9.5                 |
| MECHANICAL PROPERTIES                  | Standard   | Unit              | Value (dry/cond.)*  |
| Tensile modulus                        | ISO 527    | MPa               | 2,900 / 1,500       |
| Tensile strength                       | ISO 527    | MPa               | 50 / 30             |
| Elongation at break                    | ISO 527    | %                 | 1.9 / >20           |
| Flexural modulus                       | ISO 178    | MPa               | 2,800 / 1,300       |
| Flexural strength                      | ISO 178    | MPa               | 112 / 60            |
| Charpy unnotched impact strength       | ISO 179    | KJ/m <sup>2</sup> | 139 / NB            |
| Charpy notched impact strength         | ISO 179    | KJ/m <sup>2</sup> | 6.8 / 40            |
| MECHANICAL PROPERTIES (3D Printer bar) | Standard   | Unit              | Value (dry/cond.)** |
| Flexural modulus                       | ISO 178    | MPa               | 2,000 / 1,100       |
| Flexural strength                      | ISO 178    | MPa               | 100 / 40            |
| THERMAL PROPERTIES                     | Standard   | Unit              | Value               |
| HDT (0.45 MPa)                         | ISO 75     | °C                | 60                  |
| HDT (1.8 MPa)                          | ISO 75     | °C                | 60                  |

NB: No break.

\* dry = dry as moulded / cond.= conditioned according to ISO 1110

\*\* dry = dry as printed / cond.= conditioned according to ISO 1110. 3D printed flexural bars in direction 45º, 4 mm thickness.

| PRINT SETTINGS    | Unit            | Value                       |
|-------------------|-----------------|-----------------------------|
| Nozzle temp.      | ₽C              | 230 - 250                   |
| Type of nozzle    | -               | Brass                       |
| Bed temp.         | ₽C              | > 65                        |
| Type of bed       | -               | Glass or PEI                |
| Fan speed         | %               | 0                           |
| Layer height      | mm              | 0.02                        |
| Print speed       | mm/s            | 30 - 100                    |
| Dry specification | Before printing | > 8 hours at 70 °C (drybox) |
|                   | During printing | 70 ºC (drybox)              |

## **Certifications / Approvals**

SAKATA 3D PA-NT filament is not certified for food contact either medical applications.

## Safety Considerations

Good general ventilation of the workplace is recommended.
